

Secondary Equipment and Services Pavilion

Exhibit Opportunities

Location: Makuhari Messe Hall 1

As the global semiconductor industry continues to rebound and as "more than Moore" technologies such as MEMS and LEDs are creating new opportunities for existing fabs, the market for secondary equipment and services and productivity solutions is growing fast.

Companies serving this dynamic sector are invited to participate in the **Secondary Equipment and Services Pavilion** at SEMICON Japan 2010. This focused exhibition opportunity offers companies an effective and affordable platform to present technologies, services, and solutions for customers in Japan, and a forum to exchange information, network, and connect with partners and prospects.

Product/Service segments featured at the Secondary Equipment and Services Pavilion include:

- Secondary equipment and services
- Innovative processes and process development
- Retrofitting
- Lease and finance solutions
- Decontamination
- Logistics and other services
- Refurbishing/repurposing
